

Clinical Decision Support Link

How to Create and use a CDS (Clinical Decision Support) link for the home clinic

The CDS (Clinical Decision Support) Menu is the area of Accuro where you manage User and Global CDS links.

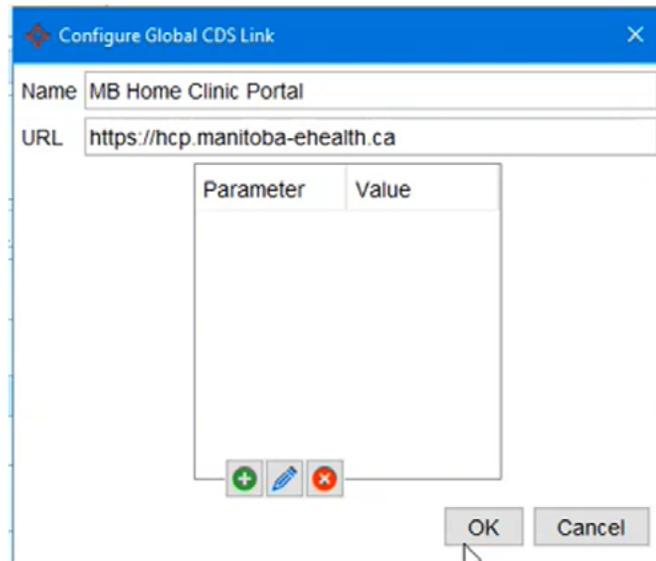

To create a CDS link to the Home Clinic Portal, follow these steps:

1. In Accuro, click the **Menu** button, select **CDS** and then **Manage Global CDS**.
We suggest using Global CDS to ensure the link is available to any user.
2. Click **Add (+)** button to add a new entry.

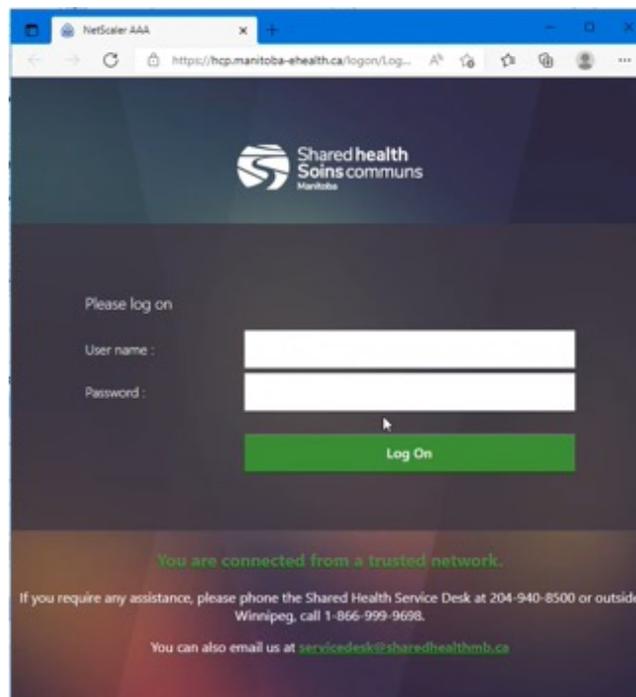

3. Enter a name for the entry

4. Enter the Home Clinic Portal URL (<https://hcp.manitoba-ehealth.ca>)

5. Click OK button to save the CDS link.

Next time you go back to the Accuro Menu and select CDS you will see the link you have created. When you click it, the Home Clinic Portal will be launched in the appropriate browser.
